

PHA- GL Physical and general linear acoustics

Chairman: Volker Mellert

- 169-0 contributed Alexei Anatolievich Zakharenko
Studying the creation of the bulk elementary excitation by heaters in the superfluid helium–II at low temperatures
- 181-0 contributed Anatoly Bronislavovich Rinkevich, Dmitry Rodionov, Natalia Stepanova
Elastic and thermal properties of heat-resistant steels and nickel-based alloys
- 351-0 contributed Sébastien Robert, Jean-Marc Conoir
Reflection and transmission by randomly spaced cylindrical inclusions in a solid slab-like region : Twersky's theory
- 382-0 contributed Pascal Rembert, Hervé Franklin, Jean-Marc Conoir
MRST formalism applied to the elastic scattering at oblique incidence by a fluid-filled cylindrical borehole
- 481-0 contributed Simon Félix, Mark Asch, Marcel Filoche, Bernard Sapoval
Increased damping in irregular acoustic cavities
- 548-0 contributed Semyon Levitsky, Rudolf Bergman, Jehuda Haddad
Elasto-viscoelastic interaction at sound propagation in polymeric liquid layer between coaxial shells
- 823-0 contributed Zoya Valisheva, Yuriy Sud'enkov
Optical-acoustic spectroscopy of metal elastic property modifications due to thermal treatment and shock strengthening
- 952-0 contributed Constantin Onescu, Ken Anai
Acoustic radiation from 3D cylinders using the equivalent sources method
- 189-0 poster Polidor Paul Bratu
Damping evaluation in case of a vibration insulation system
- 371-0 poster Anastasia Sergeevna Kuznetsova, Shrinivas Joshi, Iren Kuznetsova, Boris Zaitsev
Gravimetric sensitivity of acoustic waves in piezoelectric plates
- 397-0 poster Andrei Alekseevich Teplykh, Irina Borodina, Iren Kuznetsova, Boris Zaitsev
Hybridization of acoustic waves in piezoelectric plates
- 593-0 poster Aurelia Filipina Mihalcea
Low tuning antivibrating systems
- 628-0 poster Jaime Ramis Soriano, Eva Escuder Silla, Jesús Alba Fernández
Comparative models for the determination of the Radiation Resistance of a radiating surface.
